

Accounti ng Vocabulary

English for Accounti ng Professionals

Комплексный двуязычный учебник по бухгалтерской и финансово-отчётной лексике для студентов экономических специальностей и специалистов.

Двуязычный учебник / Bilingual Textbook

Английский текст · Объяснения на русском

Издание 2026

KHAMADI ENGLISH Platf orm

Предисловие

Данный учебник предназначен для студентов экономических факультетов, изучающих профессиональный английский язык в области бухгалтерского учёта.

После прохождения курса вы сможете:

- Читать финансовую отчётность (financial statements) на английском языке
- Понимать международные стандарты финансовой отчётности (IFRS/GAAP)
- Вести профессиональную переписку с иностранными партнёрами
- Успешно проходить собеседования в международных компаниях
- Работать с бухгалтерским программным обеспечением на английском

Структура учебника: 8 модулей, каждый посвящён отдельному разделу бухгалтерского учёта.

Все профессиональные термины даны с английским определением и русским переводом.

Примеры взяты из реальной финансовой документации международных компаний.

MODULE 1 · ACCOUNTING & FINANCE**Financial Fundamentals***Основы финансового учёта***Learning Objectives**

- ☐ Understand the purpose and scope of accounting
- ☐ Distinguish between different types of financial statements
- ☐ Use key accounting terminology accurately in context
- ☐ Explain the accounting equation and double-entry system

Introduction / Введение

Accounting is the systematic process of recording, classifying, and summarising financial transactions. It provides stakeholders — investors, creditors, management, and regulators — with reliable information about an organisation's financial position and performance.

RU:

Бухгалтерский учёт — это систематический процесс регистрации, классификации и обобщения финансовых операций. Он предоставляет заинтересованным сторонам надёжную информацию о финансовом положении и результатах деятельности организации.

Theory / Теоретический материал

The Accounting Equation

The foundation of all accounting is the accounting equation:

$$\text{Assets} = \text{Liabilities} + \text{Equity}$$

Assets are resources owned or controlled by the entity that are expected to generate future economic benefits. Liabilities represent obligations of the entity — amounts owed to external parties such as creditors, banks, or suppliers. Equity (also called shareholders' equity or net assets) represents the residual interest in the assets after deducting all liabilities.

Double-Entry Bookkeeping

Developed in 15th-century Italy by Luca Pacioli, the double-entry system records every transaction in at least two accounts. The total of all debit entries must always equal the total of all credit entries. This self-balancing mechanism helps detect errors.

Types of Financial Statements

The four principal financial statements are:

1. Income Statement (Statement of Profit or Loss) — shows revenues and expenses over a period
2. Balance Sheet (Statement of Financial Position) — shows assets, liabilities, and equity at a point in time
3. Cash Flow Statement — shows cash inflows and outflows during a period
4. Statement of Changes in Equity — shows movements in equity accounts

Under IFRS (International Financial Reporting Standards), these statements are required for public companies worldwide. In the United States, GAAP (Generally Accepted Accounting Principles) is the standard framework.

RU:

Уравнение бухгалтерского баланса: Активы = Обязательства + Капитал. Это фундамент всей системы учёта. Метод двойной записи (double-entry bookkeeping), разработанный в XV веке Лукой Пачиоли, требует, чтобы каждая операция записывалась в дебет одного и кредит другого счёта. Сумма всех дебетов всегда равна сумме всех кредитов.

Case Study: Analysing the Financial Statements of a Kazakh Manufacturing Company

CASE STUDY

KazMetal JSC is a medium-sized steel manufacturer based in Karaganda. For the year ended 31 December 2025, the company reported the following key figures:

Revenue: KZT 48,500 million
Cost of goods sold: KZT 31,200 million
Operating expenses: KZT 8,400 million
Finance costs: KZT 1,800 million
Income tax expense: KZT 1,425 million

Total assets: KZT 95,000 million
Total liabilities: KZT 38,000 million
Total equity: KZT 57,000 million

The company prepares its financial statements in accordance with IFRS.

Discussion Questions

1. Calculate the gross profit and gross profit margin.
2. Calculate the operating profit (EBIT).
3. Calculate the net profit.
4. Verify that the accounting equation holds (Assets = Liabilities + Equity).
5. What does a gross profit margin of approximately 35% suggest about KazMetal's pricing power?

Exercises / Упражнения

Exercise 1: Match each accounting term with its correct definition.

Match each accounting term with its correct definition.

(Соотнесите термин с его определением.)

- | | |
|----------------|--|
| 1. Assets | a) Amount owed to suppliers |
| 2. Liabilities | b) Income from sales |
| 3. Equity | c) Resources controlled by the entity |
| 4. Revenue | d) Residual interest after liabilities |
| 5. Payables | e) Obligations to external parties |

Exercise 2: Complete these sentences with the correct accounting term...

Complete these sentences with the correct accounting term.

(Заполните пропуски правильным термином.)

1. The _____ equation states that Assets = Liabilities + Equity.
2. In _____ bookkeeping, every transaction affects two accounts.
3. The _____ statement shows the company's financial position at a specific date.
4. Revenue minus all expenses equals _____ income.
5. The _____ method recognises revenue when earned, not when cash is received.

Exercise 3: Translate these sentences into English using correct accounting terminology.

Translate these sentences into English using correct accounting terminology.

(Переведите предложения на английский, используя бухгалтерские термины.)

1. Валовая прибыль = выручка - себестоимость реализованной продукции.
2. Дебиторская задолженность — это сумма, причитающаяся компании от клиентов.
3. Амортизация снижает балансовую стоимость основных средств ежегодно.
4. Отчёт о движении денежных средств делится на три раздела.

Professional Note

In international accounting firms (Big Four: Deloitte, PwC, EY, KPMG), English is the working language for all cross-border engagements. Mastery of accounting vocabulary is essential for passing professional qualifications such as ACCA (Association of Chartered Certified Accountants) and CPA (Certified Public Accountant).

В международных аудиторских фирмах (Большая четвёрка: Deloitte, PwC, EY, KPMG) английский — рабочий язык для всех международных проектов. Владение бухгалтерской терминологией необходимо для сдачи профессиональных квалификационных экзаменов ACCA и CPA.

MODULE 2 · ACCOUNTING & FINANCE

Assets and Liabilities*Активы и обязательства***Learning Objectives**

- ❑ Classify assets as current or non-current
- ❑ Distinguish between financial and non-financial liabilities
- ❑ Apply the recognition criteria for assets and liabilities
- ❑ Read and interpret a balance sheet in English

Introduction / Введение

The balance sheet presents a snapshot of an organisation's financial health at a single point in time. Understanding how assets and liabilities are classified, measured, and presented is fundamental to financial analysis.

RU:

Баланс представляет собой моментальный снимок финансового состояния организации на определённую дату. Понимание классификации и оценки активов и обязательств — основа финансового анализа.

Theory / Теоретический материал

Classification of Assets

Assets are classified as either current or non-current (long-term).

CURRENT ASSETS are expected to be converted to cash or used within one year or the normal operating cycle:

- Cash and cash equivalents — the most liquid assets
- Trade receivables (accounts receivable) — money owed by customers
- Inventories — goods held for sale or for use in production
- Prepayments — advance payments for future services
- Short-term investments

NON-CURRENT ASSETS are held for longer than one year:

- Property, Plant and Equipment (PP&E) — tangible assets used in operations
- Intangible assets — patents, trademarks, goodwill, software
- Long-term investments
- Deferred tax assets

Classification of Liabilities

CURRENT LIABILITIES are due within one year:

- Trade payables (accounts payable) — money owed to suppliers
- Short-term borrowings — bank overdrafts, current portion of long-term debt
- Tax payable
- Accrued expenses — costs incurred but not yet paid

NON-CURRENT LIABILITIES are due after more than one year:

- Long-term loans and bonds payable
- Finance lease obligations
- Deferred tax liabilities
- Pension obligations

Asset Recognition Criteria (IFRS Conceptual Framework)

An asset is recognised in the balance sheet when:

1. It is probable that future economic benefits will flow to the entity
2. The cost can be measured reliably

RU:

Активы делятся на оборотные (current — до 1 года) и внеоборотные (non-current — свыше 1 года). Обязательства — на краткосрочные (current liabilities — до 1 года) и долгосрочные (non-current liabilities). Актив признаётся в балансе, когда: (1) вероятно получение будущих экономических выгод; (2) стоимость можно надёжно измерить.

Case Study: Balance Sheet Analysis

CASE STUDY

Review the following extract from a balance sheet and answer the questions:

NON-CURRENT ASSETS

Property, Plant & Equipment (net)	4,200
Intangible assets	800
Long-term investments	500
	5,500

CURRENT ASSETS

Inventories	900
Trade receivables	1,200
Cash and equivalents	400
	2,500

TOTAL ASSETS	8,000
--------------	-------

NON-CURRENT LIABILITIES

Long-term loans	2,000
Finance lease obligations	300
	2,300

CURRENT LIABILITIES

Trade payables	800
Short-term borrowings	200
Tax payable	100
	1,100

TOTAL LIABILITIES	3,400
-------------------	-------

EQUITY	4,600
--------	-------

TOTAL LIABILITIES + EQUITY	8,000
----------------------------	-------

(All figures in KZT millions)

Discussion Questions

1. Verify the accounting equation.
2. Calculate working capital (current assets – current liabilities).
3. What percentage of total assets are non-current?

4. Calculate the debt-to-equity ratio (total liabilities / equity).
5. Is this company more financed by debt or equity? What are the implications?

Exercises / Упражнения

Exercise 1: Classify each item as Current Asset (CA), Non-Current A...

Classify each item as Current Asset (CA), Non-Current Asset (NCA), Current Liability (CL), or Non-Current Liability (NCL).

(Классифицируйте каждый объект.)

1. Trade receivables due in 45 days — _____
2. Land purchased 10 years ago — _____
3. Bank overdraft — _____
4. Long-term bond (due in 5 years) — _____
5. Prepaid insurance (6 months) — _____
6. Pension obligations — _____
7. Inventory of finished goods — _____
8. Deferred tax liability — _____

Exercise 2: Calculate the missing figures.

Calculate the missing figures.

(Вычислите недостающие показатели.)

1. Total assets = 15,000 | Total liabilities = 9,000 | Equity = ?
2. Current assets = 4,200 | Current liabilities = 1,800 | Working capital = ?
3. PP&E cost = 10,000 | Accumulated depreciation = 3,500 | Book value = ?
4. Revenue = 50,000 | COGS = 32,000 | Gross profit = ?

Professional Note

When reading financial reports of multinational companies, note that UK companies use "turnover" for revenue, "debtors" for receivables, and "creditors" for payables. US companies follow different GAAP terminology. Always check which framework and country standard applies.

Британские компании используют "turnover" вместо "revenue", "debtors" вместо "receivables", "creditors" вместо "payables". Американские GAAP-отчёты используют другую терминологию. Всегда уточняйте, по какому стандарту составлена отчётность.

Writing in Accounting & Finance

Professional writing in English follows specific conventions. Below are the most important genres and structures in your field.

Professional Emails (Деловые письма)

Emails in professional settings follow a clear structure: subject line, greeting, purpose, details, call to action, closing.

RU:

Деловое письмо на английском: тема, приветствие, цель, детали, призыв к действию, завершение.

EXAMPLE

Subject: Request for Meeting

Dear Mr Johnson,

I am writing to request a meeting to discuss the Q3 results.
Would you be available on Thursday at 2:00 PM?

Kind regards,
[Your name]

Professional Reports (Отчёты)

Reports use clear headings, factual language, and logical organisation: executive summary, background, findings, analysis, recommendations.

RU:

Отчёты: резюме для руководства, исходная информация, результаты, анализ, рекомендации.

EXAMPLE

REPORT: Q3 Financial Performance

Executive Summary
Revenue increased 8.3% year-on-year...

Key Findings

1. Revenue: +8.3% YoY
2. Operating profit: +5.7% YoY

Pronunciation Guide / Произношение

Correct pronunciation of Accounting & Finance terms is essential for professional credibility.

RU:

Правильное произношение терминов важно для профессионального имиджа. Ниже — типичные трудности.

1. Multi-syllable stress: ac-COUNT-ing, fi-NANCE / FI-nance, man-AGE-ment
2. Silent letters: debt /det/, receipt /rɪsi:t/, subtle /sʌtl/
3. British vs American: schedule /ʃedju:l/ (UK) vs /skedju:l/ (US)
4. Abbreviations: IFRS, GDP — pronounce each letter individually
5. Numbers: 8.5% = "eight point five percent" (not "comma")

Complete Professional Glossary / Профессиональный глоссарий

95 terms, alphabetically.

accelerated depreciation — ускоренная амортизация. Higher depreciation charges in early years of an asset's life

accounting — бухгалтерский учёт. The systematic process of recording, classifying, and reporting financial transactions

accrual — начисление/накопленные обязательства. An expense or revenue recognised before cash is paid or received

accrual basis — метод начисления. Recording revenues and expenses when they are earned or incurred, not when cash is exchanged

amortisation — амортизация нематериальных активов. The systematic write-off of an intangible asset's cost over its useful life

assets — активы. Resources owned or controlled by an entity expected to generate future economic benefits

audit — аудит; проводить аудит. An independent examination of financial records to verify accuracy and compliance

balance sheet — бухгалтерский баланс. A financial statement showing assets, liabilities, and equity at a specific date

bond — облигация. A debt instrument issued to raise capital from investors

book value — балансовая стоимость. The value of an asset as recorded in the accounts after depreciation

budget — бюджет. A financial plan expressing expected revenues and expenses for a future period

capital expenditure — капитальные затраты. Spending on acquiring or improving non-current assets

carrying amount — балансовая стоимость. The value at which an asset or liability is recognised in the balance sheet

cash basis — кассовый метод. Recording transactions only when cash is received or paid

cash equivalents — денежные эквиваленты. Short-term, highly liquid investments readily convertible to cash

cash flow statement — отчёт о движении денежных средств. A financial statement showing cash inflows and outflows during a period

cash-generating unit — генерирующая единица. The smallest group of assets that generates cash flows independently

closing balance — конечное сальдо. The balance at the end of an accounting period

collateral — залоговое обеспечение. Property or assets offered as security against a loan

- consolidation** — консолидация. Combining financial statements of a parent and its subsidiaries
- contingent liability** — условное обязательство. A potential liability dependent on a future uncertain event
- credit** — кредит; кредитовать. An entry on the right side of an account; to record an increase in liabilities or decrease in assets
- current assets** — оборотные активы. Assets expected to be converted to cash within one year
- debit** — дебет; дебетовать. An entry on the left side of an account; to record an increase in assets or decrease in liabilities
- debt** — долг/задолженность. Money borrowed that must be repaid with interest
- deferred tax** — отложенный налог. Tax that will be payable or recoverable in future periods
- depreciation** — амортизация. The systematic allocation of the cost of a tangible asset over its useful life
- disclosure** — раскрытие информации. The act of making financial information available to relevant parties
- double-entry bookkeeping** — метод двойной записи. A system where every transaction is recorded in at least two accounts, keeping debits equal to credits
- EBIT** — прибыль до вычета процентов и налогов. Earnings Before Interest and Taxes; operating profit
- EBITDA** — EBITDA — прибыль до вычета процентов, налогов, износа и амортизации. Earnings Before Interest, Taxes, Depreciation, and Amortization — a measure of core profitability
- EPS** — прибыль на акцию. Earnings Per Share — net profit divided by number of shares
- equity** — собственный капитал. The residual interest in assets after deducting all liabilities; shareholders' ownership
- expenses** — расходы. Costs incurred in generating revenue; decreases in economic benefits
- fair value** — справедливая стоимость. The price at which an asset could be exchanged between knowledgeable parties
- finance lease** — финансовая аренда (лизинг). A lease that transfers substantially all risks and rewards of ownership to the lessee
- forecast** — прогноз. A prediction of future financial results based on current data
- GAAP** — ОПБУ — общепринятые принципы бухгалтерского учёта (США). Generally Accepted Accounting Principles — US accounting framework
- going concern** — допущение о непрерывности деятельности. The assumption that a business will continue operating for the foreseeable future
- goodwill** — деловая репутация/гудвил. An intangible asset representing the excess paid over fair value in an acquisition
- gross profit** — валовая прибыль. Revenue minus the cost of goods sold, before operating expenses
- historical cost** — историческая стоимость. The original purchase price of an asset
- IFRS** — МСФО — Международные стандарты финансовой отчётности. International Financial

Reporting Standards — глобальные правила учёта, issued by IASB

impairment — обесценение активов. A reduction in the carrying amount of an asset below its recoverable amount

impairment test — тест на обесценение. An annual review to check whether an asset's carrying amount exceeds its recoverable amount

income statement — отчёт о прибылях и убытках. A financial statement showing revenues and expenses over a period

intangible assets — нематериальные активы. Non-physical assets with economic value (patents, trademarks, goodwill)

inventories — запасы. Assets held for sale in the ordinary course of business or used in production

inventory — товарно-материальные запасы. Goods held for sale or used in production

journal — журнал хозяйственных операций. A chronological record of all financial transactions before they are posted to the ledger

ledger — главная книга/бухгалтерский регистр. A book or computerised record containing all financial accounts

liabilities — обязательства/пассивы. Present obligations of an entity arising from past events, expected to result in an outflow of resources

liquidity — ликвидность. The ability to meet short-term financial obligations using available cash

loss — убыток. When expenses exceed revenue; negative net income

market value — рыночная стоимость. The price at which an asset would sell in an open market

materiality — существенность. The concept that only significant information must be disclosed in financial statements

measurement — оценка (в учёте). The process of determining the monetary amount at which an item is recognised

net assets — чистые активы. Total assets minus total liabilities; equivalent to equity

net income — чистая прибыль. Total profit after all expenses and taxes have been deducted

net realisable value — чистая стоимость реализации. The expected selling price minus costs to complete and sell

non-current assets — внеоборотные активы. Long-term assets held for more than one year

off-balance-sheet — за балансом/внебалансовый. Financial obligations or assets not appearing on the main balance sheet

opening balance — начальное сальдо. The balance at the beginning of an accounting period

operating lease — операционная аренда. A lease where the lessor retains the risks and rewards of ownership

operating profit — операционная прибыль. Profit from core business operations before interest and tax

overdraft — овердрафт. A facility allowing a current account to go below zero
